MICHELIN AND PORSCHE –

A successful partnership for optimum performance.
On the race track. On the road.

Michelin and Porsche have enjoyed close links since as far back as 1969. The partnership between these two leaders in technology has in fact been significantly stepped up in the last decade – to the benefit of every Porsche enthusiast!

As part of this cooperation, Porsche relies on Michelin's expertise long before a vehicle is launched on the market. Well in advance of

this final stage, the experienced tyre manufacturer develops specific products tailored precisely to Porsche models.

This ensures that the interaction between the chassis and tyres can be continuously optimised with precise fine-tuning. Only these high-performance tyres receive the highly coveted N-marking.

The company's successes in motorsport demonstrate how perfectly orchestrated tyre and vehicle performance can push a vehicle to its limits.

The passionate working relationship on the race track ensures that the technology is transferred to the road, forming the basis for the development of production tyres. It is no wonder then that many Porsche sports

cars are already equipped with Michelin tyres when they leave the factory.

Tyres such as the MICHELIN Pilot Super Sport or the MICHELIN Pilot Sport 2 are among the fastest tyres approved for use on public roads.

State-of-the-art technologies, hugely durable high-performance fibres and unrivalled stability even at the highest speeds – Michelin innovations provide the perfect racing components for your Porsche.

How well the companies complement each other is demonstrated by an outstanding world record from 2013:

Equipped with the MICHELIN Pilot Sport Cup 2 tyres, the Porsche 918 Spyder com-

pleted the North Loop of the Nürburgring 14 seconds faster than any other production car to date!

You too can experience the fascinating and successful working relationship between Porsche and Michelin, ensuring supreme performance every time you sit behind the wheel!

Allow our Porsche service consultants to help you find the right Michelin tyres for your vehicle at your local Porsche Centre.

MICHELIN **Total Performance**

More performances brought together

N°1 in safety and quality for European consumers.⁽¹⁾

N°1 in durability among European consumers.⁽¹⁾

Renowned for its cutting-edge technologies.⁽¹⁾⁽²⁾

(1) Survey in 4 European countries (France, Germany, Spain, Italy) and Turkey, conducted by Millward Brown on behalf of Michelin in 2013. Over 5000 people were surveyed.

(2) Michelin – development partner to Porsche.

ANOTHER DEVELOPMENT FROM PORSCHE: The N-marking.

Porsche is the very first vehicle manufacturer to introduce a specific quality seal for tyres – the N-marking.

Every tyre you receive from your Porsche service consultant at the Porsche Centre has been extensively tested and approved by Porsche. This is evident from the N-marking, which is always indicated in the tyre's technical specifications. The following abbreviations exist: N0, N1, N2, N3, N4, N5 and N6. The numbering always refers to the tyre's technical specs at the time of its approval, and is continued sequentially.

Porsche tyres with the N-marking stand out from other tyres in particular due to their geometry, the rubber compound used and the test procedure employed, which encompasses 33 key criteria in total. These include 12 objective outdoor criteria, such as dry-braking performance, wet-braking

performance and service life. There are also 16 objective indoor criteria, such as rolling resistance and performance at high speeds. In addition, the test also includes five subjective outdoor criteria, such as handling and comfort.

Porsche makes no compromises when it comes to safety, and places greater value on traction – both on dry and wet road surfaces – than on fuel efficiency in its tyre tests. No matter how tempting it may be to purchase a cheaper tyre with optimised rolling resistance – in an emergency situation, every metre of braking distance counts.

Only tyres with the N-marking provide you with the certainty that you are purchasing a high-quality tyre which has been specially tested for your model of Porsche.

MICHELIN *Pilot Sport Cup 2*

The Ultra High Performance tyres for the 911 GT models and the 918 Spyder – specially engineered for use on the race track (also approved for use on public roads)

- Shallow tread profile typical for motor racing
- Excellent grip on dry surfaces
- Limited grip on wet surfaces due to its main application

MICHELIN PREMIUM Touch Technology.

The MICHELIN Pilot Sport Cup 2 combines its top performance with an eye-catching, high-quality look. MICHELIN PREMIUM TOUCH TECHNOLOGY gives these high performance tyres their unmistakable “velvet look”.

MICHELIN *Pilot Sport* PS2

The sports tyres for the 911, Boxster and Cayman

- Top-notch grip on dry and wet driving surfaces
- Precise steering behaviour and perfect corner handling
- Maximum control for sporty driving styles

MICHELIN *Pilot Super Sport*

The sports tyres for the Panamera and Carrera GT

- Absolutely direct responsiveness
- Precise cornering
- Excellent balance

MICHELIN **LATITUDE Sport 3**

The high-performance tyres for the Cayenne and Macan

- Improved wet grip due to the higher proportion of profile grooves compared to its predecessor Michelin Latitude Sport (safety)
- Highly durable thanks to its innovative rubber compound (durability)
- Reduced rolling resistance due to variable sipe thickness and reduction in the deformation of the tread (fuel efficiency)

MICHELIN **LATITUDE Tour HP**

The energy saving tyres for the Cayenne and Macan

- Developed to minimise rolling resistance for Porsche SUVs (CO₂ reduction/fuel efficiency)
- Excellent durability
- Outstanding comfort

MICHELIN *Pilot Alpin* PA4

The high-performance winter tyres for the 911 (Type 991), Boxster (Type 981) and the Panamera

- Short braking distances on wet and icy surfaces
- Outstanding grip on snow and ice
- Excellent handling in wintry conditions

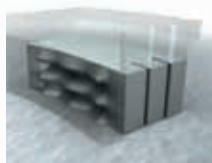

THE MICHELIN WINTER TECHNOLOGIES

StabiliGrip

EXCELLENT HANDLING:

Three-dimensional sipes

- + Arrangement at various angles
- = Effective grip on wintry roads

MICHELIN **LATITUDE** Alpin LA2

The high-performance winter tyres for the Cayenne and Macan

- Secure handling in difficult conditions
- Outstanding control, even on snowy roads
- High mobility in all manner of wintry road conditions

Consumption figures:

Macan series: Combined fuel consumption 30.7 - 46.3 mpg; CO₂ emissions 216 - 159 g/km
Cayenne series: Combined fuel consumption 24.6 - 42.8 mpg; CO₂ emissions 267 - 173 g/km
GT3: Combined fuel consumption 23 mpg; CO₂ emissions 289 g/km
Cayenne S-E Hybrid: Combined fuel consumption 83 mpg; CO₂ emissions 79 g/km; combined electricity consumption kWh/100 km 20.8
918 Spyder: Combined fuel consumption 91.1 mpg; CO₂ emissions 72 g/km; combined electricity consumption kWh/100 km 12.7

THE EUROPEAN TYRE LABEL

1

FUEL EFFICIENCY: 7 EFFICIENCY CLASSES FROM A (MOST EFFICIENT) TO G (LEAST EFFICIENT)

The **rolling resistance** is a crucial factor governing fuel efficiency. The difference in fuel efficiency for a fully equipped vehicle between efficiency classes A and G can be up to 7.5%⁽¹⁾.

2

WET GRIP: STOPPING DISTANCE ON A WET ROAD SURFACE 7 EFFICIENCY CLASSES FROM A (SHORTEST STOPPING DISTANCE) TO G (LONGEST STOPPING DISTANCE)

The **difference in stopping distance** between tyres belonging to efficiency class A and G for a vehicle which is equipped with four tyres of the tested model can, in the case of wet grip (stopping distance on a wet road surface), be up to 30%⁽²⁾.

Assuming that a car is travelling at 80 km/h, this may mean a shortening of the stopping distance of up to **18 m**.⁽²⁾

3

EXTERNAL ROLLING NOISE OF THE TYRE ON THE CARRIAGEWAY:

Class of external rolling noise and corresponding measured value (dB)

Three waves indicate the worst performance. The tyre generates rolling noises which are below the current limit⁽³⁾, but exceed the limit⁽⁴⁾ which will apply in the future.

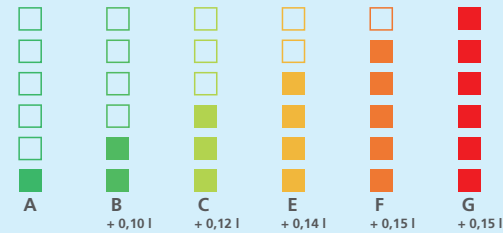

Two waves: The noise level of the tyre is equivalent to the future limit⁽⁴⁾ or is lower than this.

One wave: The noise level of the tyre is lower than the future limit⁽⁴⁾ by at least three decibels.

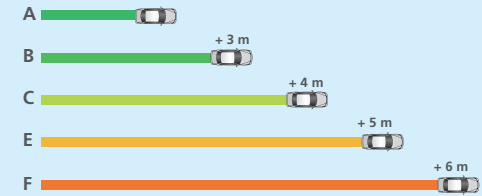

Example (car tyre):

Additional litres over 100 km with an average consumption of 6.6 l
Class D does not apply

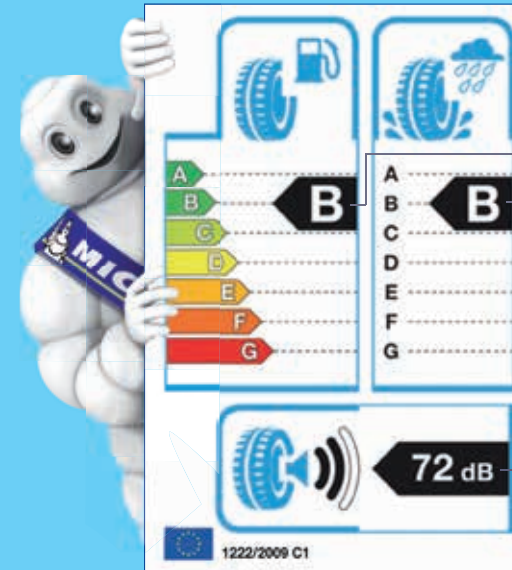

Source: European Commission's Impact Assessment SEC (2008) 2860
* If measurement was performed in accordance with the test methods stipulated in Regulation 1222/2009/EC

Example (car tyre):

Stopping distance (80 -> 0 km/h)
Classes D and G do not apply

* On a road surface with average grip
